-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 28 October 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Oct 28, 2008, has been entered.

### ***Election/Restrictions***

2. Applicant's election of the species of Figs. 1A-2D, readable on claims 18-20, 22, and 24, in the reply filed on April 30, 2007, is acknowledged.

3. Claims 21, 23, 25, 27-30, 32-37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Tureman, Jr. (2,435,614).

Tureman, Jr. (2,435,614) discloses a multi-joint drive mechanism comprising a flat-plate shaped bone-member layer member (see Figs. 1 and 2) in which a plurality of bone members are arranged in arrays, the plurality of bone members being movably coupled

at flat-plate shaped coupling portions (see Fig. 2), and elastic members (23, 26,28) which are arranged so as to stretch over the coupling portions on a contact-surface side of the bone-member layer member that makes contact with an object or on its non-contact-surface side opposed to the contact-surface side and moreover which are fixed between the plurality of bone members, wherein the multi-joint drive mechanism drives flexural motions (see Fig. 2) with the coupling portions between the plurality of adjoining bone members serving as joints by expanding or contracting the elastic members, and the multi-joint drive mechanism has a layer structure (Fig. 2) in which at least the flat-plate shaped bone-member layer member and the elastic members are arranged in a planar fashion.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tureman, Jr. (2,435,614) in view of Maeda (4,364,593).

Tureman, Jr. (2,435,614), as presented above, does not show deformation sensor to detect. However, Maeda (4,364,593) teaches a pressure sensor to detect the fingers (col. 6, lines 25-30). Thus, it would have been obvious to those skilled in the art to provide sensors on the Tureman, Jr. (2,435,614) as taught by Maeda (4,364,593) to detect the hand movement.

***Response to Arguments***

8. Applicant's arguments with respect to claims 18-20, 22, and 24 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL T. CHIN whose telephone number is (571)272-6922. The examiner can normally be reached on MON-THURS (7:30 -6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saul Rodriguez can be reached on (571) 272-7097. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
